

# Undergraduate Probability I

Class Notes for  
Engineering Students

Free Research and Education Documents

Fall 2011

# Contents

<b>1</b>	<b>Mathematical Review</b>	<b>1</b>
1.1	Elementary Set Operations . . . . .	3
1.2	Additional Rules and Properties . . . . .	5
1.3	Cartesian Products . . . . .	6
1.4	Functions . . . . .	7
1.5	Set Theory and Probability . . . . .	8
<b>2</b>	<b>Combinatorics</b>	<b>11</b>
2.1	The Counting Principle . . . . .	12
2.2	Permutations . . . . .	13
2.2.1	Stirling's Formula* . . . . .	15
2.2.2	$k$ -Permutations . . . . .	15
2.3	Combinations . . . . .	16
2.4	Partitions . . . . .	17
2.5	Combinatorial Examples . . . . .	20
<b>3</b>	<b>Basic Concepts of Probability</b>	<b>23</b>
3.1	Sample Spaces and Events . . . . .	23
3.2	Probability Laws . . . . .	26
3.2.1	Finite Sample Spaces . . . . .	29
3.2.2	Countably Infinite Models . . . . .	30
3.2.3	Uncountably Infinite Models . . . . .	31
3.2.4	Probability and Measure Theory* . . . . .	34
<b>4</b>	<b>Conditional Probability</b>	<b>37</b>
4.1	Conditioning on Events . . . . .	37

4.2	The Total Probability Theorem . . . . .	40
4.3	Bayes' Rule . . . . .	43
4.4	Independence . . . . .	44
4.4.1	Independence of Multiple Events . . . . .	46
4.4.2	Conditional Independence . . . . .	47
4.5	Equivalent Notations . . . . .	49
<b>5</b>	<b>Discrete Random Variables</b>	<b>51</b>
5.1	Probability Mass Functions . . . . .	52
5.2	Important Discrete Random Variables . . . . .	54
5.2.1	Bernoulli Random Variables . . . . .	54
5.2.2	Binomial Random Variables . . . . .	55
5.2.3	Poisson Random Variables . . . . .	56
5.2.4	Geometric Random Variables . . . . .	59
5.2.5	Discrete Uniform Random Variables . . . . .	61
5.3	Functions of Random Variables . . . . .	62
<b>6</b>	<b>Meeting Expectations</b>	<b>65</b>
6.1	Expected Values . . . . .	65
6.2	Functions and Expectations . . . . .	66
6.2.1	The Mean . . . . .	69
6.2.2	The Variance . . . . .	71
6.2.3	Affine Functions . . . . .	72
6.3	Moments . . . . .	73
6.4	Ordinary Generating Functions . . . . .	74
<b>7</b>	<b>Multiple Discrete Random Variables</b>	<b>79</b>
7.1	Joint Probability Mass Functions . . . . .	79
7.2	Functions and Expectations . . . . .	81
7.3	Conditional Random Variables . . . . .	83
7.3.1	Conditioning on Events . . . . .	86
7.4	Conditional Expectations . . . . .	87
7.5	Independence . . . . .	90
7.5.1	Sums of Independent Random Variables . . . . .	91
7.6	Numerous Random Variables . . . . .	93

<b>8</b>	<b>Continuous Random Variables</b>	<b>97</b>
8.1	Cumulative Distribution Functions . . . . .	97
8.1.1	Discrete Random Variables . . . . .	98
8.1.2	Continuous Random Variables . . . . .	100
8.1.3	Mixed Random Variables* . . . . .	101
8.2	Probability Density Functions . . . . .	101
8.3	Important Distributions . . . . .	103
8.3.1	The Uniform Distribution . . . . .	103
8.3.2	The Gaussian (Normal) Random Variable . . . . .	104
8.3.3	The Exponential Distribution . . . . .	107
8.4	Additional Distributions . . . . .	110
8.4.1	The Gamma Distribution . . . . .	110
8.4.2	The Rayleigh Distribution . . . . .	112
8.4.3	The Laplace Distribution . . . . .	113
8.4.4	The Cauchy Distribution . . . . .	114
<b>9</b>	<b>Functions and Derived Distributions</b>	<b>117</b>
9.1	Monotone Functions . . . . .	118
9.2	Differentiable Functions . . . . .	121
9.3	Generating Random Variables . . . . .	124
9.3.1	Continuous Random Variables . . . . .	125
9.3.2	Discrete Random Variables . . . . .	126
<b>10</b>	<b>Expectations and Bounds</b>	<b>129</b>
10.1	Expectations Revisited . . . . .	129
10.2	Moment Generating Functions . . . . .	132
10.3	Important Inequalities . . . . .	135
10.3.1	The Markov Inequality . . . . .	136
10.3.2	The Chebyshev Inequality . . . . .	137
10.3.3	The Chernoff Bound . . . . .	139
10.3.4	Jensen's Inequality . . . . .	140
<b>11</b>	<b>Multiple Continuous Random Variables</b>	<b>143</b>
11.1	Joint Cumulative Distributions . . . . .	143
11.2	Conditional Probability Distributions . . . . .	146

11.2.1	Conditioning on Values . . . . .	147
11.2.2	Conditional Expectation . . . . .	148
11.2.3	Derived Distributions . . . . .	149
11.3	Independence . . . . .	151
11.3.1	Sums of Continuous Random Variables . . . . .	153
<b>12</b>	<b>Convergence, Sequences and Limit Theorems</b>	<b>159</b>
12.1	Types of Convergence . . . . .	159
12.1.1	Convergence in Probability . . . . .	161
12.1.2	Mean Square Convergence . . . . .	161
12.1.3	Convergence in Distribution . . . . .	162
12.2	The Law of Large Numbers . . . . .	162
12.2.1	Heavy-Tailed Distributions* . . . . .	164
12.3	The Central Limit Theorem . . . . .	165
12.3.1	Normal Approximation . . . . .	167
